Consoles C and X Go To Next Page

This data is for general communication (no restriction).

1. Create the channel listing on the MYE programming remote to 1 channel. (see link at the bottom of this page)

2. Place MYE Programming USB into console USB port

3. While in SEND mode on the programmer, Point remote sensor at the USB Stick and press SEND. The left side of the USB stick will blink indicating that it's receiving the channel listing from the remote Once the blinking stops, the channel listing has been uploaded to the USB Stick.

4. With the MYE USB stick in place, begin the download sequence by pressing R-UP, R-Down, R-UP, R-Down, TIME.
   a. If a check mark appears, it means it's successful. Move on to 7.
   b. If an X appears, repeat steps validate that you only get 1 channel

5. Validate that MYE program channel list has been uploaded on console. Also check for sound. It should only be 1 channel
   a. If successful, move to step 8
   b. If not successful repeat steps 1-7.
   i. If still unsuccessful, open console to check MYE receiver version. If it is MLF2-C93. Escalate to Engineering

6. Reprogram the MYE receiver to the correct channel listing (Concord has 10 Channels). Follow steps 3-7

7. Once the correct channel listing is uploaded, validate
